

WORLD HERITAGE LAB

The Association of Italian Heritage World organizes and promotes the "World Heritage LAB", with the support of the Italian Ministry of Cultural Heritage and Activities and the National Italian Commission for UNESCO.

The LAB, which as a whole will end in the summer of 2019, will be divided into three themes: # Communicating - New words for World Heritage, #Management - Site Manager and World Heritage, #Valorising - Territories and World Heritage Properties.

The LAB consists of three meetings: Ferrara, Florence and Venice plus a conference in Rome, that will be held at the headquarters of the MiBAC to present the results of the project and the reports of the three different workshops. Reports documents about THE W.H.Lab will be available on website of the Association of Italian World Heritage.

Supported with the funds of Law 77/06, the LAB is configured as a path of updating and comparison, dedicated to operators and specialists who deal with the Italian Cultural Heritage, with particular reference to the managing bodies of World Heritage properties.
